

# **GUIDE TO PUBLISH IN GROUPS**

## Guide To Publish In FB Groups

When we have already assumed that we want to be an integral part of **bUnited** business and contribute a hundred percent of our effort to our project, of our available time, in making this project grow for us and for the community, it is because each of we already have in mind the goal we want to achieve within **bUnited**. First in the period of expansion in which we are, afer, as active members within the organization and business that this will manage.

To achieve this, we have to work, as we are already doing, but we believe it is important to work intelligently and efficiently, so that the results are as satisfactory as possible for all.

To help you in this work, I have created this **Guide To Publish In FB Groups**, this guide is based on the work that we are developing ourselves with acceptable results.

#### **Selection of FB Groups**

Since you already publish in groups of FB, you are members of a large number of them, but at this point it is important to make a selection of them, that is, try to publish in those groups that are closer to the system used by our business. (MLM Multilevel Marketing, Affiliate Marketing, Business Groups and Entrepreneurs, Work from home, Earn money online, Teleworking and the like). Theoretically, the people who are members of these groups, or who visit these groups, many of them, are knowledgeable about these marketing and business systems, so the possibilities of success of our publications in these groups increase significantly with respect to the Groups where everything is advertised or generic (There are generic Classified sites where similar businesses to ours are advertised, those should also be selected to publish, but it is convenient to visit each site to check the convenience of publishing in each site).

Since in the lists of groups we have there are generic groups and many others that are more specific or closer to the subject of our business, it is advisable to make that selection in order to improve our results.

#### **Creativity of Publications and Comments**

Since our business is unique and very different from others that are advertised with affiliate systems, it is important that our ads and publications also make that difference, we should not do or look too much in what others do, in our ads, we have just highlight the important lines of our business ...

- 1) Summarize the business we are promoting.
- 2) Summarize what our business is going to be and what it can give to whoever wants to participate in it.
- 3) Summarize what can be contributed to the interested parties and families by our business.
- 4) Invite potential interested parties to participate in our business.
- **5)** Remember generically income that can contribute to those interested (It is important that the interested is left with curiosity) and put the link to subscribe.
- **6)** Choose photographs that identify or converge with the text of the advertisement, writing on the same slogans that attract those who see the advertisement.

#### **Example Ads Text**

**EXTRA INCOME WITHOUT INVESTMENT.** We pay you to unite new members, we have a Global Affiliate System of 5 levels. **UNLIMITED INCOME!** 

#### **RESERVE YOUR INCOME NOW!!**

1 Sign up FREE

2 Invite your friends to join

That's all you have to do

You can earn as much as you want, ideal for people who want to reach the highest in the personal and the economic. It is **FREE** and no investment is required.

#### JOIN FOR FREE HERE

#### **Example Ads Photo**

The ads do not necessarily have to be exactly the same as the example, but it is convenient to handle the concepts of the example when writing them.

#### **COMMENTS**

Comments serve to reposition our ads in first place, instead of continuously publishing new ads, we can opt for this option, which takes less time and, as we will see later, when posting comments, we can have more ads again in the first position, at least for a while, depending on the advertisers that each group has.

To Access or Join to **bUnited CLICK HERE** 

Business Community Wogii FREE Online Marketing CLICK HERE

4

As in the case of advertisements, it is important that our comments are of quality and that they express parts of the content of our business. Likewise, it is also important to have a good variety of phrases that comment on our business.

#### **Examples of Comments Based on our bUnited Business**

- 1) We pay you for recommend, here you can win large sums of money, register for free through the link ...
- 2) The business with which you can obtain unlimited income, investment is not required, inform yourself here ...
- 3) A different and unique business, referral system with 5 levels, register for free and get unlimited income by inviting friends ...
- 4) Here you can win as much as you want, it's free and without investment, check how much you can win ...
- **5)** When you join, you secure your income. This helps make our platform the largest customer community in the world ...
- **6)** Members of our platform save between 20% and 30% on the things they consume and can earn unlimited income for belonging to it ...
- 7) Our platform negotiates lower prices for its members and demands that companies make the planet more sustainable. Register for FREE and get unlimited income for inviting friends ...
- 8) Every time your friends and friends of your friends save on things they buy, we pay you, here you can get unlimited income ...
- **9)** See how your income is calculated, why and when we pay you, and where all the money from your income comes from ...

As in the case of the ad example, the comments do not necessarily have to be exactly the same as the example, but it is advisable to use the concepts of the example when writing them.

#### **Programming of Publications and Comments**

In the programming of publications it is important to take into account several issues. To program the number of daily publications that we want to do, we must take into account our usual Facebook activity, that is, how much time that we normally interact on a daily basis (This will help us not to have problems with FB), if previously we have not interacted too much On Facebook, it is better to start with fewer daily publications and increase the number of publications as the days go by.

In any case, here we will expose the ideal number of daily publications in different groups and the number of comments advisable to make each day and time intervals to publish both announcements and comments, taking into account that the publications will be made manually.

For those who are dedicated exclusively to promoting a business, the ideal number of ads to publish daily would be between 30 and 40 ads, but manually publishing this number of daily announcements, besides being quite tortuous, leaves us very little time for other activities that We also have to do and since most of the people who promote business online are freelancer, it is necessary to have a formula that causes the same effects and gives us the desired results by publishing a significantly smaller number of ads daily.

#### Therefore, we will follow the following steps:

1) Every day we will publish between 15 and 20 new ads, and at least 20 to 30 comments in previously published ads, if we can make more daily comments in previously published ads, better

To Access or Join to **bUnited CLICK HERE** 

still, but it is important to have in Note that if our number of comments is very bulky each day, we may have problems with our Facebook account, it is better to adjust to the number that I describe to not have these problems.

- 2) The time that must elapse between new ad publications is a minimum of 5 minutes and a maximum of 15 minutes, depending on our previous activity on Facebook, for users who have a regular publication activity, the average time interval ideal between publications would be 7 minutes.
- 3) We can also choose to share the ads in the different groups, this is a solution that will save us a lot of time in our promotional work. In this case we can share the announcement in the groups that we want to publish from a blog or web, if you do not have a website or blog, you can create one in Google Blogger completely free and share the ads since the blog that you have created. With this option we can publish sharing the number of ads that I have indicated above, one after the other, in approximately 10/15 minutes depending on how fast each one is.
- 4) The publication of comments in previously published ads can be done during the time intervals between publication and publication of the new announcements, in each interval we can publish between 1 and 2 comments. After we have finished publishing new announcements each day we can continue to post comments until we reach the ideal number of comments each day.
- 5) Although for comments there is not a space of time to wait between publications of the same, it is good to space your publication at least 1 minute so that they are not considered as spam.
- **6)** To locate ads previously published in a group to insert comments; since many groups have a large number of members that publish ads, our ads will be missing from the first places in these groups, so as not to waste time looking for them, we can choose two ways to locate our ads ...

#### HOW DO I FIND MY ADVERTISEMENTS?

- a) Save the link of each ad we publish to later open it through that link and place our comment.
- b) Search in the group itself including part of a sentence of our ad in the box to search for publications, located in the left half of the page of each group, taking as an example the announcement of the example that we have put above, we only place in the publication search box part of the phrase that contains the ad "UNLIMITED INCOME", our ad will automatically appear and we can place our comment, so that the ad goes up to the first position.

And to end with this part, comment that in many groups are not allowed to publish more than 1 ad per day, so it is convenient, if you can, read the rules of each group, otherwise follow this rule to avoid problems in the group.

On the other hand, in some groups the publications go through the approval of the moderators, in these groups it is better not to publish, since usually they take a long time to approve them and in some cases they never approve them.

#### Method of Execution of Scheduled Publications and Best Times to Publish

According to our publishing schedule, in that way, we must execute it, there will be members who dedicate more time and others who dedicate less time, each one will dedicate the time available, but it is essential to dedicate the necessary time to comply with the schedule that we have prepared for each day. To publish between 15 and 20 new announcements and between 20 and 30 comments each day, we will have to devote to this work between 1 and 2 hours daily. If we choose to share the ads instead of publishing them directly in each group, it will take much less time doing the same work, between 30 minutes and 1 hour approximately every day.

To Access or Join to **bUnited CLICK HERE** 

For the results we are getting, the best times to publish our announcements and comments are the afternoon hours, between 4 pm and 10 pm, this does not mean that ads can not be published at other times, but at times of the morning are giving worse results.

#### Be Constant in the Daily Work

The constancy in daily work is essential for our program to be successful, if we are not constant and do not do the work we have scheduled for each day, the results will hardly come, we must always accomplish the task we have scheduled for each day, and never leave anything of what we have to do today for tomorrow and not stop doing the work any day of the week that we have programmed to do it, the fulfillment of these two parameters of being constant, is fundamental for succeed, in this and in any business and if it is well executed together with the other parameters of this guide, we will have a very high percentage for the achievement of our objectives.

#### How Long is It Useful to Answer Information Requests

When people interested in the business ask us for information about it, it is very important to respond to the request in record time, it is considered that responding to a request for information within 60 minutes is acceptable, but if we can respond before that time would be more acceptable if possible, there are times when it is impossible to do so for reasons of availability, but to have a good response from potential stakeholders, it is advisable to organize ourselves so that we can give the appropriate response at that time optimum.

#### This Would Be An Example Of Answering The Request Information About bUnited

Hello ... ..., thanks for the interest, it is a network business, a new global platform where millions of products, goods and services will be sold. To know the scope of the business you must see the videos that are available on our website, for this you can subscribe without obligation through my page ... ... ... ... ... ... ... Best regards.

As in the case of the example of the announcement and the comments, the response to the request for information does not necessarily have to be exactly the same as in the example, but it is advisable that the concepts of the example be used when writing the same.

#### **Results and Motivation**

Applying the parameters described in this guide, it is getting to register between 1 and 2 guests per day, but beware, there will be days when no one is registered, there may even be several days in a row where no guests are registered, but There will also be days when up to 4 and 6 guests are registered in a single day.

Business marketing is not exact mathematics, and we must maintain the motivation to execute the scheduled work every day and if we do so, with constancy, the work of each day, it is sure that we will end up having acceptable results.

In those days of nothing, when you feel discouraged, think about your goal to achieve in the business in which you are working, and what it will provide you, your family and the great team you have with you, because you are not alone, many of us are with you, maybe this sounds like something that many other people say millions of times through networks, just to capture people, but in this case you will have realized that this is the case, as says, it is; THIS GUIDE TOGETHER WITH OTHER FREE MARKENTING TOOLS, IS THE TRIAL.

# **Content Marketing**

# Content Marketing Positioning, capture or sell through the contents

Be the king or queen of your sector and increase your subscribers or sales by improving your content!

Surely you've heard that content is king, does it sound? And if it sounds to you, it's because Google thinks so! Content marketing is the king of all online marketing strategies, so including it in your daily work plan will not only make you capture more people or increase your sales, but also allow you to:

- **OVER IT :** Position yourself in the sector by multiple keywords,
- increase the number of users who visit your website or blog,
- of that your web or blog sells or captures new people for the business that you promote,
- or transmit more confidence. After all, your website is one of your presentation cards.

If you really want to be the king or queen of your business sector, make yourself a hole in the market and get your products or services found by users and sold or subscribed (Depending on the type of business), the contents marketing with an extra touch of copywriting can help you a lot both in the short and long term.

Of course, for it to take effect, there must be a combination of what Google searches for your content and what users want to see and read.

Pleases both and you will get Google to position you, and users to subscribe, buy you, or become part of your affiliate network.

#### How to create a Free Blog?

To put into practice the work of promoting our business through Content Marketing, we need to have a blog of our own in which we can publish our articles. Creating a blog to promote our business with content marketing is relatively easy, although on the internet there are countless platforms where you can create free blogs, one of the options that can best be handled by people with little experience, is Blogger by Google, with blogger you can create an blog in minutes, even having no experience in blog creation, you may know other options that you know how to handle, but if you do not have experience, do not complicate your life, use blogger and start publishing your articles as soon as possible.

#### Where do I get the content to publish articles?

In the case of businesses like that of **bUnited** you can create articles using the content of the web itself, in other businesses you can surely use the web of the business as a source, yes, but it is important that you contribute to the texts your a personal touch so that they are not exactly the same as those on the web, since Google does not like contents that are exactly the same as those already published.

To Access or Join to **bUnited CLICK HERE** 

#### Try to create content that creates value

In this part it is important that we strive to create articles that are of interest to the interested potential, at the same time they must be didactic, when you create content of value you give to know concepts that the readers will thank, in some way, the content of value directs the reader interested in it and you will get your interest in what you offer through the article. Below is an example of an article based on bUnited's business.

#### **Article Example**

#### New Promotional Space for Community Activities, NGOs and Charities Organizations

The NGOs, charities and people working in community activities have a new space to promote their activities to capture needs in their community work. Social soup kitchens, collaboration groups, places of refuge, humanitarian aid organizations, foundations, help against hunger and others, have this space at your disposal in bUnited to cover your communication needs. bUnited is a new platform created to make our world more just and sustainable and provide resources to the people who need them most on our planet.

At **bUnited** we pay you to unite new members, we have a Global Affiliate System of 5 levels. **HERE YOU CAN GET UNLIMITED INCOME!!** 

#### **RESERVE YOUR INCOME NOW!!**

1 Sign up FREE

3 That's all you have to do

You can earn as much as you want, ideal for people who want to reach the highest in the personal and the economic. It is **FREE** and no investment is required.

#### JOIN FOR FREE HERE

Keywords: #Socialsoupkitchens #collaborations #shelters #NGOs #charities #humanitarianaid #fundations #helpagainsthunger #communityjobs

To Access or Join to **bUnited CLICK HERE** 

The articles that you write, although initially they are copied topics, when you have given them your personal touch, they will appear as new articles for Google, in the medium and long term, the blog will be positioned in the search engines and this will bring new interested in what you offer

#### How to get performance to your publications in the short term?

As you share ads in FB groups, the articles are content that you must also share, you will share them from your own blog in your personal profile of FB and in those FB groups you choose on Twitter and other social networks where you have an account. .

Each article is important to share at least in 15/20 groups that you have chosen, in addition to other networks. It is also important to re-share each article on the days after its publication for at least one week. In this way we will be attracting the attention of potential interested in what we offer, just like when we publish an advertisement.

#### How many articles to publish each week?

To carry out this work well, it is advisable to make publications of the highest possible quality and to create good publications takes a little time, depending on the imagination of each one to give that personal touch to the articles, creating an article of 10/12 paragraphs of text can take between 15 and 30 minutes. When it comes to creating value, quality is more important than quantity, therefore, it is advisable to create and publish between three and four weekly articles, you can publish more, but taking into account that you also have to make other advertising publications every day, that number is fine for so we do not get overwhelmed with work.

#### The importance of the banners in our blog

The Advertising banners are another tool that you must include in your blog (Banners that link the web page of your business). When you share content from your blog, those interested in clicking on the publication will go directly to your blog, and your blog should have links and ads clearly visible on the website of your business, the article itself should have a link to it, but it is omportant insert advertising banners that direct visitors to the website of the business so they can visit it and achieve the goal of registering, buying, etc.

The creation of an advertising banner is very simple but it is always convenient to have a banner creation tool that facilitates your work and you can create a banner of great quality, at the end of the day you present your business and present it well and so that it draws attention is very important.

For the creation of advertising banners, we are going to use a high-quality and easy-to-use FREE tool, called GIMP. In the following pages I describe the tool, the download link and other details ...

To Access or Join to **bUnited CLICK HERE** 

#### Banners and Free Photographs

To create your promotional banners you will need quality digital material such as photos, backgrounds, vectors, etc., to get the material you need we recommend you visit Pixabay.com, from Pixabay you can download all the digital material you need for FREE to create quality promotional banners .

All the material that you download from Pixabay is free of rights so you will not have any legal impediment when publishing your banners.

To obtain photographs or illustrations of the topics that interest you for the creation of your banners, in Pixabay.com you can search for photos or illustrations, inserting in the search bar the keyword of the theme you wish to download, (Example: If you want to find photographs or illustrations about restaurants, you write the keyword "Restaurants" and you click on search, like this, with any topic about which you want to download photos or illustrations).

#### Software for Edition and Creation of Banners

**GIMP** Image Editor, is a FREE Open-Source image editor that allows you to edit and create high-quality photos or illustrations.

With GIMP you can cut out images or illustrations adapting them to the needs you have for the creation of your commercial banners.

In addition to the functions we have cited above, it has a large number of features to incorporate your photos and banners, it is very complete and easy to use, even for people who have no experience in creating banners or advertising photos.

Once the banner is created, it allows you to export it to the PC folder where you want to save the banner in different formats.

With GIMP you can produce professional quality banner without any cost, the only cost will be your work. To download I have installed GIMP for FREE, click on ....... GIMP.ORG

In the following link you can see a tutorial to know how GIMP works ... .... https://www.youtube.com/watch?v=SIwMhfsbLho

# Vídeo Marketing

#### Effectiveness and reliability

Make yourself known, show yourself as you are and you will notice the effectiveness!

"The average Internet user spends 88% more time on a website that contains video."

This is what Codefuel has indicated and no, it is not the only interesting figure that I can reveal about Video Marketing. After all, video is one of the digital tools that is working the most and the best.

Every day the number of users who come to him to find important information increases or even to share it with his friends.

In addition, its use in landing pages increases the conversion in nothing more and nothing less than 80%. Regarding this, if you want to check its accuracy, you just have to do an A / B test: one of them can include video and the other one can leave it without video.

Because, if there is something that the videos have, they transmit much more confidence, so the effectiveness of this resource, compared to any other, is much higher.

Make yourself known with a video, show yourself as you are, transmit confidence to your audience and you will notice it.

#### How to make a good video that impacts the audience?

As we have seen in content marketing, to make a video, the first thing we need to do, is a good script. Based on the article that I have set as an example in content marketing (Page 23), we can take that same text and narrate it in parts and with pauses between the different aspects of the subject that deals with this content.

To narrate the theme we have chosen, we will include video clips in which topics analogous to what is narrated are displayed. We will also include a quality background music that will enrich the video as a whole (Narration, film and music).

#### What is the ideal length of time for a good video?

The ideal duration of a video, varies according to the objective and subject to be exposed in it, but when it comes to promotional videos, as is the case, the shorter and more explicit the video is better.

The purely promotional videos usually last between 30 and 40 seconds depending on the medium in which they are advertised, but in our case, it is about making a video that exposes some of the foundations of our business, therefore, we will make a video a bit longer, the ideal time is between 2 and 3 minutes.

#### Where to publish our video?

There are plenty of different platforms to publish videos, the most known by all are youtube and facebook, probably the simplest for their management, especially for those who are not very expert in the matter, therefore I advise to publish our videos on our channel from youtube and

To Access or Join to bunited CLICK HERE

facebook.

#### How often do I publish a new video?

To carry out a good job in video marketing, it is important to plan a program of publications that contains a weekly video, so that we have time to promote it properly, we have to take into account that video marketing is a part of total marketing of hat we have to do to promote our business, therefore, publish a weekly video, leaving us time to promote it properly until the next video is published.

#### How to promote the video that we have published?

So that each video that we publish has the maximum possible visualizations, we will share it in 15/20 groups of FB every day for at least six days and so with each new video that we publish. We can also use the comments we have discussed in the guide to publish in FB groups, since the comments position the publication again.

The promotion of the videos published can continue to be done over time, so that the visualizations of the same, are the maximum possible and directed to the potential interesteds to the web of our business.

For the creation of videos, we are going to use a high-quality and easy-to-use FREE tool, called OpenShout. In the following pages I describe the tool, the download link and other details ...

#### Video Clips and Free Photographs

To create your promotional videos, you will need quality digital material, such as photos, video clips, backgrounds, vectors, etc. To obtain the material you need, we recommend you visit Pixabay.com. From Pixabay you can download all the digital material you need. FREE to create quality promotional videos.

All the material you download from Pixabay is free of rights, so you will not have any legal impediment when posting your videos.

To obtain photographs or video clips of the topics that interest you for the creation of your videos, in Pixabay.com you can search for photos or video clips, inserting in the search bar the keyword of the subject you wish to download, (Example: Yes, you want to find video clips about restaurants, type the keyword "Restaurants" and click search, like this, with any topic about which you want to download photos or videos.

#### Softwares For Editing And Creation Of Videos

**OpenShot** Video Editor, is a FREE Open-Source video editor that allows you to edit and create high quality videos.

With OpenShot you can cut video clips adapting them to the needs you have for the creation of your video.

OpenShot offers the possibility to intersperse music and voice, in both cases you can regulate the volume to produce a quality video in both visual and sound.

In addition to the functions we have cited above, it has a large number of features to incorporate into your videos, it is very complete and easy to use, even for people who have no experience in creating videos.

Once the video is created, it allows you to export it to the PC folder where you want to save the video in different compatible formats, according to the requirements of most platforms where videos are published.

With OpenShot you will be able to produce professional quality videos without any cost, the only cost will be your work. To download and installed OpenShot for FREE, click on ..... OpenShot.org

If you are a virtuosus in managing programs for the creation of videos, you can use MUVIZU software to create animated video movies.

With MUVIZU you can create animated video movies with original characters that you have created yourself, MUVIZU allows you to create videos of all kinds adapted to the script that you have previously written, although working with MUVIZU is more laborious than working with video editors such as OpenShot, the originality and quality of the animated videos created with this software are truly professional and make the difference between a common video and an extraordinary video.

MUVIZU has a free evaluation version with limited functions, but the full version is of paid a has a very affordable price.	and

# **Chat Messages**

#### Closeness bears fruits

#### Transmit them closeness to your contacts and friends and let them ask you!

The Chat messages are another form of contact to increase your chances of growth in the business you promote. They are opportunities to attract potential interested in your business that you should not miss. And for two main reasons:

- 1. Because they improve the user experience. For them, the fact of being able to contact you quickly and directly is an added value and differential.
- 2. Because, again, you are capturing leads. With chat messages you easily spread your business proposal and allow users to contact you by the same means in case of interest, or simply visit the website of your business and become customers, affiliates, etc, of the proposal of business you promote, and when there is a lead, there is a sales opportunity, affiliation, etc. that is indisputable.

#### What chat system to use to spread my message announcing my business proposal?

You can use all those systems with which you usually have an account and interact with your contacts and friends, perhaps the most used is WhatsApp, but you can also use Messenger, Skype, Telegram and others with which you usually interact.

#### How often do I send a message to each user?

Although there are users who send messages repeatedly to their contacts, it is not good to abuse messages, this it can be counterproductive. My recommendation to send messages through this system, is to send the message only once to each user, that is, only present our business to our contacts and friends, those who see it interesting, they will contact you or visit your website that have the business proposal.

That if, as in the other marketing formats we have seen, send quality information, that creates value, that creates interest in the recipient of the message.
